

MATTHEW BRIDGES DESIGN

PRESS RELEASE

Issued: 20 September 2012
For Immediate Release

Invest in space with the SEER table

Refined, simple and functional with clean lines and a distinctive silhouette, the SEER table is designed for anyone who appreciates craftsmanship and attention to detail combined with innovative, original design.

The SEER table expands elegantly in seconds using a simple, patented mechanism. With just one hand you can increase the table's dimensions from seating four adults (95x95cm) to seating eight (135x135cm).

The table operates by a simple rotation of the sub base - automatically lowering the centre square, which then allows finger access to flip open the leaves and increase the tabletop area. The same operation in reverse reverts the table back to its smaller state.

Made with responsibly sourced materials, the SEER table is available in the highest grade American black walnut and European oak timber and veneers.
